

SAFETY AND TRAINING MANAGER

Bi-Con Services, Inc., located near Cambridge, Ohio, has helped energy and manufacturing companies around the world compete in the global marketplace for over 50 years. Our construction, electrical, commercial building and manufacturing divisions offer a variety of services throughout the Eastern United States. Bi-Con is currently seeking a **Manager of Safety and Training**.

Primary responsibilities include: promoting a proactive company-wide safety culture, with focus on education and accident prevention; developing and evaluating safety policies to ensure they meet legal, regulatory and company requirements; establishing, developing and administering effective training courses and programs; and working with Division Managers to assist with safety and training needs.

The position will include managing department personnel; managing DOT operator qualification programs; performing accident investigations; traveling to jobsites to perform safety, training and employee assessments (expected travel 30-40%); and evaluating subcontractor safety programs.

Bachelor's degree in Safety, Industrial Hygiene or related field required. Demonstrated related experience may be substituted for preferred education. 10+ years' experience in a construction EHS management role required. CSP and OSHA 500 and/or SafeLand Trainer certification preferred, as well as experience in the natural gas or related industry. Knowledge of OSHA 1910 & 1926, strong communication and interpersonal skills and proficient knowledge of Outlook and Microsoft Office Suite are required.

Bi-Con Services, Inc. offers a competitive wage and benefits package.
